1. The Working Group devoted the first portion of the meeting to reviewing definitions, types of uses of ELINT data, and a list of emitters and signals that had been discussed at the previous meeting. The JCS definitions of intelligence, technical intelligence, and operations were accepted after slight modification by the Working Group, with the understanding that they would be checked against any USIB terminology for possible conflicts.

2. During the remaining portion of the meeting potential use of a transform to relate values associated levels of conflict/tension, National, Theater and Local levels, and Intelligence, Technical Intelligence, Operations uses. It was recognized that Training could not be included.

3. The Chairman suggested that the Members of the Working Group should read the testimony of Dr. A. C. Enthoven, Assistant Secretary of Defense for Systems Analysis, at a hearing before the Subcommittee on National Security and International Operations, Committee on Government Operations on 27 September and 18 October 1967. Enthoven's descriptions of systems analysis could probably be used in the final report of the Group.
